**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Hashimoto et al (5,048,990).

The Hashimoto et al reference discloses A retractable-nib writing tool having a retractable writing body 8 in a shaft tube 1 and having a sealing lid 4 and a sealing tube 3 which seal the writing nib 8c of the writing body 8 in association with the forward and backward movements of that writing body, wherein: the sealing lid 4 and a guide tube 11 fixed to the writing body are linked by a plurality of thin line portions 15 (16 or 17), the sealing lid 5 and thin line portions 15 (16 or 17) are formed integrally, and the sealing lid 4 is opened and closed relative to the sealing tube by the forward and backward movements of those thin line portions 15v(16 or 17).

Regarding claim 2, the plurality of thin line portions 15 (16 or 17) can be bent and deformed.

Regarding claim 3. The retractable-nib writing tool comprises means of regulating the forward motion of at least one thin line portion out of the plurality of thin line portions 15 (16 or 17) which are advanced by the forward motion of the guide tube.

Regarding claim 5, one thin line portion out of thin line portions which are advanced by the forward motion of the guide tube is loosely inserted into the guide tube and engaging means to engage with that guide tube is provided.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hashimoto et al (5,048,990).

Although the Hashimoto et al reference does not specifically disclose the sealing force between the sealing lid 4 and the sealing tube 3 being 50-100 kPa and the water vapor transmissivity of a material of the sealing tube or sealing lid, it would have been obvious to one of ordinary skill in the art at the time the invention was made to select a sealing force and a material having certain properties for the sealing lid and the sealing tube of the Hashimoto writing tool within a certain range to best fit a particular writing tool design and to optimize the performance. See *In re Aller*, 105 USPQ 233, using the optimum or workable ranges involves only routine skill in the art.

***Allowable Subject Matter***

5. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 8-16 allowed.

**Conclusion**

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hashimoto '867 disclose a writing tool with a sealing cap.
